Work Experiences

Creative Lab, Samsung Research. Mar 2019 - present
I am now involved in a Start-Up project that develops deep learning based application. In the project, I am working as a software engineer and scrum master.

SW Platform Lab, Visual Display Business. Aug 2012 - Feb 2019
I have worked at UI Framework part for 7 years to develop Tizen based GUI Framework, which has been used to implement major native UI Applications on our Smart TV Series.
In this part, I have constructed and maintained our pure core UI framework based on gles and several related open sources.

Education

Ulsan National Institute of Science of Technology   **Aug 2010 - Jul 2012**
M.S., Electronic & Computer Engineering, 2012.

Pukyoung National University,   **Mar 2002 - Feb 2006**
B.S., Computer Multimedia Engineering, 2006.

Dissertation

"Histogram Equalization for 3D Point Models"
In this paper, I proposed a method to enhance salience feature from a 3D Point cloud model by applying geometry histogram modification.

Research

Pusan National University   **Aug 2009 - Jul 2010**
Neural Network Lab., Research Associate
Project: Vehicle Recognition based on neural network from image sequence.

Computer Skills

Languages C/C++/C#/Python
Libraries OpenCV/OpenGL

Qualifications

Samsung Software Certification - Professional
OPIc(IH)
